

Trenchless Technologies – Real World Pipebursting and HDD

Wednesday 10:00 AM – Noon

Presented by: Ted Berry Co., Inc. and Enterprise Trenchless Technologies, Inc. (ETTI)

Drilling and pipebursting for install and replacement of pipelines.

The Basics of Jobsite Erosion and Sediment Control

Wednesday and Thursday 1:00 – 3:00 PM

Presented by Pete Hanrahan, CPESC: Everett J. Prescott, Inc.

The goal of this presentation will be to assist construction professionals at all levels to understand the basics of jobsite sediment and erosion control management. The development of new technology and best management practices provide jobsite solutions that are both practical and cost effective.

- Tools and Technology for Jobsite Sediment Control
- A Full Range of Permanent Erosion Control Solutions
- Best Management Practices for Solutions with Minimal Environmental Impact

Pete Hanrahan is a Certified Professional in Erosion and Sediment Control and has nearly 30 years of industry experience. He has spoken at many national conferences, including the International Management Council, Land Improvement Contractors of America, International Erosion Control Association, and the International Fabrics Association.
